Introduction	1
Installation	1
Command Line	1

Introduction

Bazel might be sourcing dependencies from unexpected domains. We can run bazel sync under strace to capture these ip addresses.

Installation

Software can be installed through apt-get. The following commands will add the ppa and install the software.

```
sudo curl -s --compressed -o /etc/apt/sources.list.d/bazel_network_sync.list 'https://raw.g'
sudo apt update
sudo apt install bazel_network_sync
```

The debian file can also be installed/uninstalled directly. To uninstall you can use:

```
sudo apt remove bazel_network_sync
```

Command Line

The tool can be used from the command line.

```
like google but you get numbers:
--query arg      noogle search query
-h [ --help ]    produce this help message
-v [ --version ] display version
```
